

Thank you for choosing Rosetta hardscape products. The following are some helpful tips to make your first installation go smoothly. For more in-depth technical information, see our Rosetta Technical Guide (available at rosettahardscapes.com) or contact Rosetta Tech Support.

Your safety is important to us. Please follow OSHA guidelines, and utilize safety-toe boots, hardhats, gloves and eye, ear & respiratory protection whenever appropriate.

REQUIRED TOOLS

- LEVEL
- TAPE MEASURE

PATIO TOP INSTALLATION

- Fire pits should never be installed atop a patio surface. Rather, the fire pit should be “cut in” to the patio surface to avoid damage to the patio.

BASE PREPARATION

- Build fire pit, on level ground, as shown in the assembly detail.

CHECK SQUARENESS

- After completing the first layer of block, check vsquareness by measuring the diagonals with a tape measure. Adjust block as necessary.

BLOCK PATTERN

- Alternate block direction with each layer. Build three layers tall. Place the square liner into the completed assembly.

STEEL LINER ALIGNMENT

- In the completed installation, the steel liner should rest evenly on the top layer of block.
